

— THE PROBLEM

# Six hundred scripts, one deadline.

- Marking handwritten booklets takes weeks of evenings.
- Marks are hard to explain to moderators, students and appeal panels.
- Students who are falling behind are found only when results are out.

### With Oxonia Mark

Oxonia Mark drafts the syllabus with you, marks handwritten or online scripts against your rubric with evidence for every mark, and shows which students need support and what to revise.

● AI-enabled. A person approves every official record.

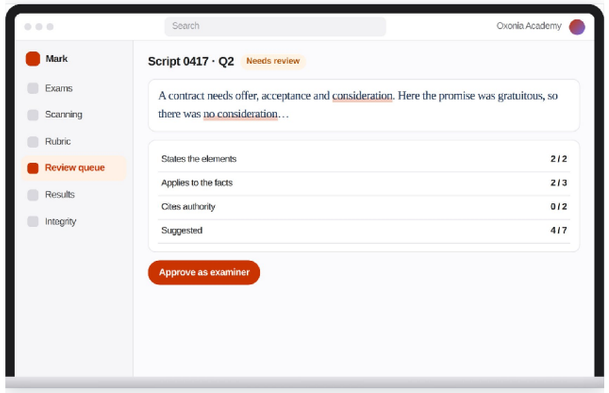
OXONIA

# Mark

Curriculum, assessment and progress, every mark explained.

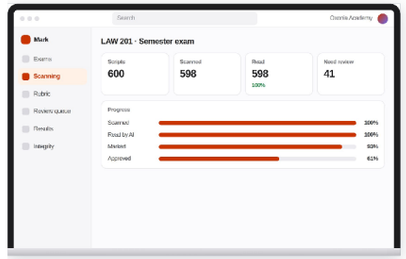
**oxonia.ai**

## HOW IT WORKS

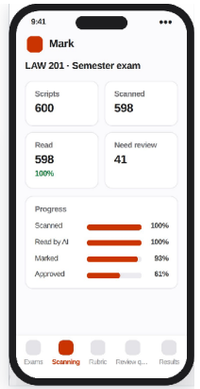


Every mark quotes its evidence

1. **The syllabus, week by week**
   Drafted from the lecturer's notes and approved by the exams office; every exam is checked against it.
2. **Scan with a phone**
   Booklets photographed even with no signal, uploaded when it returns, and matched to candidates. Online exams too.
3. **Evidence for every mark**
   Marked against an approved rubric; each mark quotes the words that earned it, with a confidence score.
4. **Only the hard scripts reach people**
   Uncertain, illegible, borderline and flagged scripts go to the review queue.
5. **Approve, moderate, release**
   A named examiner approves every script; external examiners moderate a blind sample; the results pack goes to Senate.



Scanning progress for an exam



Scanning on a phone

## ALSO INCLUDED

**Student progress**
Who needs support and why, from their own results, with the next step from the syllabus.

**Exam prep**
Past papers, how the lecturer asks, and timed mock exams marked point by point.

**Students see why**
The marked script, feedback for every question and which week to revise.

## WHO USES IT

**Lecturers**
Drafts the syllabus and reviews only the scripts that need judgement.

**Exams office**
Syllabuses, scanning, deadlines and the Senate pack.

**External examiners**
Moderates a blind sample and signs the report.

**Students**
Sees why each mark was given, and practises with mock exams.

## WHAT IT MEANS FOR YOUR UNIVERSITY

**Saves time**

- Only uncertain and borderline scripts reach your examiners.
- The syllabus draft, the broadsheet and the Senate results pack are prepared for you.

**Saves money**

- Booklets scanned with the phones and copiers you already have.

## QUESTIONS UNIVERSITIES ASK

**Can we scan where there is no signal?**
Yes. Scanning works offline, and uploads resume automatically when the signal returns.

**Who decides the final mark?**
A person. Nothing is released until a named examiner approves the script, and external examiners moderate a blind sample.

**Can students challenge a mark?**
Yes. Re-mark requests and appeals are tracked to a decision.

**Who owns our data, and is it safe?**
Your records belong to your university. Each university's data is kept separate and every access is written to your audit log. We don't use your content to train AI models, and our AI providers work under business terms that don't allow training on it. Oxonia is built for Nigeria's Data Protection Act and the UK GDPR, and you can export everything.

## WORKS WITH THE REST OF OXONIA

One Oxonia Academy ID signs everyone in to every product your university gives them, and a launcher shows each person the products they may open.

**Oxonia Scribe**
Every lecture, captured and turned into study packs.

**Oxonia Tutor**
An Oxford-style tutorial for every student.

**Oxonia Senate**
Council, Senate and committees, from agenda to signed minutes.
